

Index

Page numbers in *italics* refer to pages containing charts or tables.

A

adhesion, 5, 7
alliums, 54–55, 67
arugula (rocket), 36–37, 69
available moisture, 6, 7, 18–19

B

beans, 37–38, 69
beets, 38–39, 67–68
books, recommended reading, 76–78
brassicas, 24–25, 41, 67, 68–69. *see also*
arugula; broccoli; brussels sprouts;
cabbage; cauliflower; kale; kohlrabi;
rutabagas
broccoli, 39–40, 68–69. *see also* brassicas
brussels sprouts, 41–42, 67. *see also*
brassicas

C

cabbage, 42–43, 66, 67. *see also*
brassicas
calcium, soluble, 25
capacity, water-holding, 5–7, 8
capillarity, 9, 21–22, 27–29, 76
carrots, 43–44, 67–68
cauliflower, 44, 68–69. *see also* brassicas
celery, 31, 66, 75
chard, 44–45
chicory, as green manure, 20
clay soils, 6, 7, 16–17, 72–73
clover, as green manure, 20
compacted soils, 14, 15–17
compost, 18–19, 77
corn, 45–46, 75
crop rotation, 20–21, 31, 55, 69, 78
cucumbers, 46–47, 53, 69. *see also*
cucurbits
cucurbits, 35, 46, 53, 69. *see also*
cucumbers; melons; squash

D

dates for sowing and planting, 36. *see also specific vegetable names*
density of plants
capillarity, 9
effect on root growth, 10
effect on soil moisture, 2
effect on yield, 12

density of plants (*continued*)
recommendations, 10–11, 35–36. *see also specific vegetable names*
traditional vs. raised bed gardens, 33–34

dispersion, 72
Dittmer, 10
drip buckets, 26, 72
droughts and water shortages, 2, 10–11, 33
dust mulch, 9, 11, 13, 21–22, 28
Dyna-Gro, 25

E

efficiency of plants, 74–75
eggplant, 47–48, 68
endive, 48, 68
evaporation, 2, 3, 8, 22, 72. *see also*
capillarity; transpiration

F

fertigation
broccoli, 39, 40
brussels sprouts, 42
chard, 45
defined, iv
drip buckets, 26, 72
kale, 50
kohlrabi, 51
melons, 54
overview, 25–26
peppers, 56
squash, 61
tomatoes, 62
fertility of soil, iv, 17, 23–24
fertilization methods, iv, 23–26, 43, 57
fertilizers. *see also* fertigation; *specific vegetable names*
chemical, 21, 25
green manures, 17, 19–21
organic, 20–21, 23, 25, 26, 45
overview, 23–26
field capacity, 5–7, 8
fluid drilling, 29–30, 48
foliar sprays, iv, 23–26, 43, 57

G

garden planning. *see* planning gardens
germination. *see* seed sprouting
grasses, as green manures, 19–20

Index

green manures, 17, 19–21. *see also*
fertilizers

Growing Vegetables West of the Cascades
(Solomon), 1, 10, 15, 66, 77

H

heirloom varieties, 33–35. *see also*
specific vegetable names

herbs, 48–49

hoeing techniques, 11, 13, 21–22, 57

humus, 18–19, 21

I

insecticides, 24

irrigation

dispersion, 72

drip buckets, 26, 72

estimated requirements, 3

fertigation, iv, 25–26. *see also specific*
vegetable names

raised beds, 1

urban gardens, 71–73

vegetables with heavy needs, 31

during water shortages, 11

in water-wise gardens, 65–66, 71–73

J

Jori clays, 17

K

kale, 49–50, 67. *see also* brassicas

kohlrabi, 50–51, 68. *see also* brassicas

L

leeks, 51–52, 67

legumes, 20, 38, 69. *see also* beans;
clover; peas

lettuce, 52–53, 66, 67

lime, agricultural, 20

M

melons, 46, 53–54, 69. *see also* cucurbits
moisture, available, 6, 7, 18–19

moisture loss. *see also* soil moisture

capillarity, 9, 21–22, 27–29, 76

evaporation, 2, 3, 8, 22, 72

rate, 10–11

transpiration, 5, 8, 10–11, 23, 31

moisture stress, iv, 1, 5, 12, 44

moldboard plows, 15

mulch, dust, 9, 11, 13, 21–22, 28

mulching methods, 21–23, 78

N

Naan sprinklers, 66

nursery beds

broccoli, 40

cabbage, 42

garden planning, 66

general method, 30–31

lettuce, 53

onions and leeks, 51–52, 54, 67

O

onions/scallions, 54–55, 67

organic matter mulching, 21, 78

oxygen levels of soil, 13–14

P

parsley, 55

peas, 55–56, 68, 69

peppers, 56, 68

planting gardens. *see also specific*
vegetable names

author's garden, 66–69

density of plants, 27, 35–36

irrigation, 27, 65–66

nursery beds, 30–31

plot size, 65

site evaluation, 14–15

urban gardens, 73

year-round harvest, 65

plant spacing. *see* density of plants;
specific vegetable names

planting and sowing dates, 36. *see also*
specific vegetable names

plowpan, 15–16, 20

plows, 15–16

poppies, as green manure, 20

potatoes, 56–58, 69–70

R

rainfall, summertime, 1, 8, 12

raised beds

history, 33

method of gardening, i, 73

moisture loss, 1

nursery beds, 31

plant density, 11–12, 35

in water-wise gardens, 66

Rapid-Gro, 25, 26

rate of plant growth, 10, 23–25

Index

rate of water loss, 10–11. *see also*
moisture loss
reading, recommended books, 76–78
Red Arrow, 24
rocket (arugula), 36–37, 69. *see also*
brassicas
root development
dwarf varieties, 50
effect of plant density, 10
heirloom varieties, 34–35
potential, 14–15
process, 9–10
soil characteristics, 7, 13–17
soil maintenance, 15–17, 19–21
in specific vegetable families, 41, 43,
53
rotation of crops, 20–21, 31, 55, 69, 78
rutabagas, 58–59, 67. *see also* brassicas

S

Safer's Soap, 24
sand, 6, 7, 16, 18–19, 72–73
scallions/onions, 54–55, 67
SCS (Soil Conservation Service), 18
seed companies, 34
seed sprouting. *see also specific vegetable names*
cucurbits, 46
fluid drilling, 29–30, 48
nursery beds, 30–31
overview, 30–31
soaking, 29, 48
without water, 27–28
self-sufficiency, ii, 34
site evaluation, 14–15, 17–18, 35
site preparation, 20–21
soil amendments, 18–19, 20
soil characteristics. *see also* soil tests
clay content, 6, 7, 16–17
compaction, 14, 15–17
effect on root development, 7
fertility, 17, 23–24
humus, 18–19, 21
oxygen levels, 13–14
particle size and surface area, 6
subsoil, 16–17, 19
texture, 6, 7
Soil Conservation Service (SCS), 18
soil maintenance, 15–17, 19–21

soil moisture
available moisture, 6, 7, 18–19
capacity, 5–7, 8
capillarity, 9, 21–22, 27–29, 76
effect of fertility, 24–25
effect of temperature, 2
evaporation, 2, 8, 22
loss, 1, 3, 7–9, 10–11
moisture stress, iv, 1, 5, 12, 44
mulching methods, 21–23, 78
seasonal cycle, 3, 8, 13
transpiration, 10–11, 23, 31, 85
wilting point, 7, 12
windbreaks, 23
soil tests, 14–15, 18
Solanaceae, 68. *see also* eggplant;
peppers; potatoes; tomatoes
sorrel, 59–60
sowing and planting dates, 36. *see also specific vegetable names*
spacing of plants. *see* density of plants;
specific vegetable names
spinach, 60
squash, 46, 53, 60–62. *see also* cucurbits
Stout, Ruth, 21, 78
stress
due to moisture loss, iv, 1, 5, 12, 44
due to nutritional deficiencies, iv, 23
stunting, ii, 23
subsoil, 15, 16–17, 19–21, 24, 78
subsoil plows, 15, 16
surface area of soil particles, 6
swiss chard, 44–45

T

temperature, 2, 23
Territorial Seed Company, 20, 34
tomatoes, 62–63, 68
transpiration, 5, 8, 10–11, 23, 31
Turner, Newman, 20, 78

U

Umbelliferae, as green manure, 20
urban gardens, 21, 71–73

V

varieties, heirloom, 33–35. *see also specific vegetable names*
vegetation density. *see* density of plants

Index

W

- water films, 7
- water-holding capacity, 5–7, 8
- water loss. *see* moisture loss
- water shortages and droughts, 2, 11–12, 33
- water-wise techniques
 - dust mulching, 9, 11, 13, 21–22, 28
 - encouraging root development, 13–17
 - fertilizing, iv, 23–26, 43, 57
 - irrigating, 26, 65–66, 71–73
 - mulching methods, 21–23, 78
 - reducing plant density, 10–11, 33, 35–36
 - seed sprouting, 27–31
 - soil maintenance, 15–17, 19–21
 - weeding, 8, 13, 22
- weeding, 8, 13, 22
- wilting point, 5, 7, 12, 53
- windbreaks, 23
- winter gardening, 23, 30, 65, 69, 74
- Winter Gardening in the Maritime Northwest* (Colebrook), 23
